

A test case for a FULL STACK DEVELOPER

Make an app that includes a few responsible pages.

Technologies to use:

FRONTEND

- **Make a few responsible pages.**
- **Use such technologies:**
- **React**
- **Styled-component**
- **Redux - it's great if you will use it**

BACKEND:

- **Make an open API that will help you manage data**
- **Node.js (Nest is the preferred framework)**
- **MySQL/Postgress**

<https://www.figma.com/file/OmpRyHggknkIZ7Qr1c5o5gg/Untitled?node-id=7965%3A2&t=bglEFmQnCZ6zeiqM-0>

- 1. Upload the application to any server,**
- 2. Upload a link to the uploaded application and to the GitHub.**
- 3. Make it the best you can. Show your skills. Waiting to work with you)**
